

MINI-MITE

Designed to give smaller producers state-of-the-art technology for generating vibrant and consistent Color Enriched mulches. Exclusive dual shaft design creates high levels of kinetic energy on the wood fiber, resulting in superior colorant coverage, reduced water rates and penetration. Easy-to-use controls regulate water, colorants and wood fiber, allowing customers to minimize production costs. Heavy-duty steel design ensures years of durable service. Comes with the Amerimulch commitment of total customer satisfaction. For maximum performance, always use [Heartland Enriched Colorants](#).

Specifications:

Production Range	50–80 Yrds/Hr
Water Requirements	15–35 Gal/Min
Power Supply	460–Volt 3–Phase
Feed Hopper	5 Cubic Yards, Laser Sensor Technology, Variable Speed Hopper Drive
Mixing Deck	8' Dual Shaft
Motor	10 hp Electric
Height	8 feet
Length	17 feet 9 inches
Width	4 feet

ALL SYSTEM PRICING INCLUDES INSTALLATION ASSISTANCE, MAINTENANCE AND SAFETY TRAINING.
